Free Trade Cant.

The New York Herald is in a hysterito according to the purpose of

The New York Herald is to a hysterical frame of mind over the purpose of the Ways and Means Committee to present the minoriae of continuing pare a tariff bill at this reasion on the ground that "all winter long, as well as all next apring and aummer, there will be a tariff termoil and tumult." It calls upon the business men' of the country to organize against . !!auch'a misoblevous a theme" because "lif they, do not protect, organize and make themselves effective, by heard they know very well that husiness, so far as it is affected by the isroif, will be at a standarill."

This is but a fair sample of the utter rot that appears day after that in the free trade papers. It is because business has been at a standarill for the past three years that the people of the country low demand a specified the prosent clustering. There is no question of uncertainty involved in the prosent clusters of the country low demand a specific trade of the country low demands aspecific trade of the country low demand a specific trade of the country low demand a spe mented by the fact that the people did not know the real meaning of Demoferitie rule. Cleveland was avain elected and at the same time the salairs of the country were entrusted to a D. mocratic Congress. The moment it became known that the way had been paved for Demogratic legislation business confidence was thaken. The fear of a Democratic Congress was justified by subsequent eyents as the legislation that followed completely paralyzed business. [

Conditions went from bad to worse until in the election of 1994 the people not only reduked the party responsible for this state of effairs but in the electique of a Republican House made it im-publication the Democratic party to go any farther in the direction of so-called tar ff reform. In the quippligh recently closed the hore of the people, both as regards a stable currency and needed tariff legislation, rested in the Republican party. No section of the Republithoroughly endorsed by the masses than the tariff plank. No feature of the campalge ardused more entitusiasm than a reference to the resestablishment of : taria policy avonedly in the interest of the American people, who, having had ample opportunity to test the policy of both parties on this question, were fully allys to the importance of the situation. In view of these facts how slily it is .

for any paper to appeal to the business men to organize against the very policy for which they voted with such remarkable quantinity only last month. A RJ blican revision of the tariff will not disturb business. It is in the interest of business, as it is also in the interest of the wage-carners who have been suffer ing for years past by reason of the tory polley the New York Recald would have nudisturbed. The Herald and papers of that class auccoded in fooling the peopie once, but their effort to keep up the delusion after the sad object lesson of setual results will the unavailing. The tariff will be revised on the lines of the Republican National ptatform which has ment of the American voters."

They have leased a circular calling upon all to rover at one of we state tadt to east hopest elections to enroll themselves na members, irrespective of previous political associations. They have decided to contest the seats of the silver Democratic candidates for Congress in the Second, Fourth and Fifth districts, to whom certificates bave been given by the Election Board. They are now taking evidence to show that these candidates were elected by fraud. They claim to have already found in there, three districis that 26,000 Republican baltota were rejected on one pretext or another, Choice of upon technicalities that were trivial, falthough the intent of the voler was mani-fest. They have the affidavits of 18,000 men in these three districts who were prevented from casting their ballots by the interference of challengers or unjust rulings of the Boards of Electron. For example, in the Jickeon ward, of

Richmond, where there are 3,500 negro roters, only 900 were allowed to cast their ballots. The remaining 2,000 were prevented from loting by being crowded away from the polls, and the right to vituwas deuled to some because they eduld not tell who their grandfather was or whether he was onturalland. A representative of the United Associated Presses, has had another interview with Mr. (Thomas Cellery, secretary, of the National Sallors and Firemen's Union. He found him full of hope over the prosters of an international strike (Ballor Supers from every quarter, he said, supervered a strike.

Asked should, it be tentalizedy delayed, to permit of further organization, Mr. Calbery, said the goldens feeling seemed about evenly belanced, but an international strike would certainly come, if the employers refused to do inables to the men fastike weaklesses to the men fastike would certainly come, if the employers refused to do inables to the men fastike would certainly come, if the employers refused to do inables to the men fastike would certainly come, if the employers refused to a forced, when they would get the New York men to 500, for their condition was wrichestly bad, perhaps eyen worse than British dock laborers.

Mr. McHurkishad, reported that the American man were well organized, that the American man were well organized, that the American man were well organized that the American man were well organized. Pursuant to requer I have examined the preparation known at SALVA-TAX and find the same to be composed of perfective hamiless and efficient medicinal constituents principally of vegetable origin. Ci cinical analysis, demonstrates the entire absence of any metalle collon, stell as lead, mercury, arse ic, copper, c.c., or their sails, as also the sails sampling (splum), strye mine cic.

It is not the office of the chemist to point out the medicinal application of any preparation still, knowling the inature of the constituent clements which compose SALVA-CTA. I can say that the properties jot the same are so well defined that I am justified las saying tighand accomplish their work fore which rich is recommended. "NEW YORK, October 21, 1575."
